Why are you considering leaving your current position?

I am looking for a career in Computer Science related field for my internship.

What aspects of your past / present jobs have been most challenging?

The challenge is adapting to a new environment to study through an online platform during the Covid-19 at home.

Tell me about a professional challenge you've faced and how it was resolved:

It is the tight deadline. During the study, a lot of work needs to catch up. To overcome this challenge, I will make a to-do list on Google Keep to ensure I can track my work progress and finish it on time.

What do you feel were your most significant accomplishments on the job?

My most outstanding achievement is I am able to get a Dean's list for semester 6. Since this semester required a lot of assessments, I stayed organized and constantly aware of the project's deadlines by making a to-do list.

What do you consider to be a strength of yours?

My strength is I can work in a team well. I can accept other people's opinions and ensure two-way communication in group work. I am also a passionate person that continuously improves my coding skills by adding more knowledge.

What do you consider to be your weaknesses?

My weakness is low confidence in talking in front of people. To solve this problem, I challenge myself to be more active by joining the programmes under the university club.

Tell me why you think you would be a good fit for this position:

I can fit this position as I am proficient in programming languages such as HTML, JavaScript, PHP and CSS. I have experience in developing a web-based application using the Laravel framework.

What are your professional goals for the next 5 years?

I want to be a Software Developer that can lead a team well in developing projects that can give a positive impact toward the company and community. I also want to learn a new language, such as Python.

Comments:

Thank you for considering my application and looking forward to getting a place for an internship at your company.
